

Stefanos A. Papadopoulos, PE, GE
Associate Engineer, ENGEIO Incorporated, San Francisco, California, United States

BS, Civil Engineering, University of California at Berkeley, 1992
MS, Civil Engineering, University of California at Berkeley, 1994
Years of experience 25, with ENGEIO: 15

Mr. Papadopoulos has extensive experience with a broad range of concentrations within the geotechnical field. His work experience includes project management and oversight of large-scale projects for public works, residential, commercial and mixed-use developments in urban settings. He is especially skilled in waterfront and marine engineering, hydraulic structures, industrial facilities, transportation and infrastructure improvements, residential and commercial developments, and military base re-use projects. He coordinates complex field investigations, provides design recommendations and communicates with various stakeholders in providing geotechnical services to both public and private sector clients. Prior to joining ENGEIO in 2002, he was involved in major transportation projects including Egratia Odos in northern Greece, and the Bay Area Rail extension to the San Francisco airport.
